

Zinc Sulfate Monohydrate

AP Feed Grade

Chemical Name: Zinc Sulfate Monohydrate

Chemical formula: ZnSO₄·H₂O

Molecular weight: 179.45 g/mol

Appearance

White powder

Properties

Zinc Sulfate is an essential nutrient for animal health. It is used in animal feed to ensure healthy growth and development. Adequate Zinc Sulfate supplies play a crucial role in your animal's health and assist in bodily functions.

Usage

Zinc sulfate has a wide range of applications as Fertilizer, Animal Feed, Zinc Electroplating, Galvanizing, Zinc Oxide Production, usage in Water Treatment and in the Chemical Industry.

Packing

Packed in P.P. woven bags of 25kg net each

Typical Properties

Purity	≅ 98 %	Lead (Pb)	≅ 10 ppm
Zinc (Zn)	≅ 35 %	Cadium (Cd)	≅ 10 ppm
Arsenic (As)	≅ 5 ppm	Particle Size	95% pass through 250µm
